Features:

- + **Search Bar** allows you to quickly search for content by keyword.
- + **Expanding Folder Structure** makes it simple to organize/access files.
- + **New Content Packs** make lesson planning easy. Download them to the Imported Content Packs folder to preview the contents prior to installing.
- + **Drag-and-Drop** function lets you add new content quickly—just drop it into the gray area below the Category Tabs.

Gallery

Instructor note: Use this page to demonstrate the following gallery items:

Searching for an item

Adding a flash object

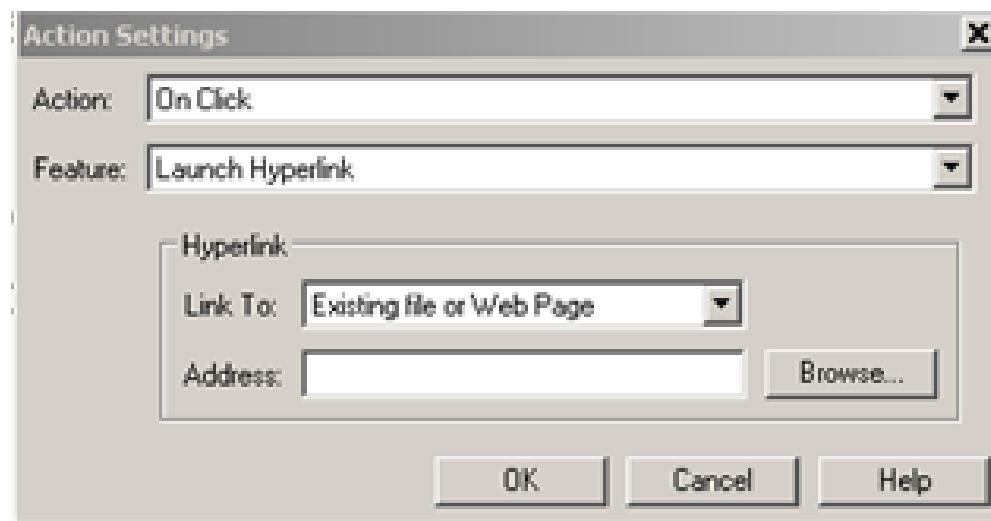

Adding a sound

Hyperlinking/Action Settings

1. To begin, you must first identify what you want to click on in order to initiate the link. You may choose to use text or a picture.
2. Once you have chosen the object you want to click on, right click on the object and select "hyperlink".
 - To hyperlink to a web page, simply type the web page address into the "Address" box.
 - To hyperlink to another page in the Notebook file, select it from the drop down list in the "Link to:" box
 - To hyperlink to another file, click the "Browse" button and search for it.

Putting it all together
